Past performance is no guarantee of future results. The Fund's performance data represents past performance and does not guarantee future results. Current performance may be lower or higher than the performance data shown. The investment return and principal value of an investment will fluctuate so that you may have a gain or loss upon sale. You can obtain performance data current to the most recent month-end at www.arrowmarkpartners.com/meridian.

A Class: Prior to 7/1/15, the A Class was named Advisor Class. The historical performance shown for periods prior to inception on 11/15/13 was calculated using historical Legacy class performance as adjusted for estimated class-specific expenses, for distribution, shareholder servicing and sub-transfer agency fees without consideration to any expense limitation or waivers. The annual gross expense ratio is 1.46% as of 12/30/22. The annual net expense ratio is 1.46% as of 12/30/22. If the class had been offered prior to 11/15/13, the actual performance and expenses may have differed from the amounts shown. Performance shown for class A shares with load includes the Fund's maximum sales charge of 5.75%. C Class: The historical performance shown for periods prior to inception on 7/1/15 was calculated using historical Legacy class performance as adjusted for estimated class-specific expenses, for distribution, shareholder servicing and sub-transfer agency fees, without consideration to any expense limitation or waivers. The annual gross expense ratio is 1.12% as of 12/30/22. The annual net expense ratio is 2.19% as of 12/30/22. If the class had been offered prior to 7/1/15, the actual performance and expenses may have differed from the amounts shown. Investor Class: The historical performance shown for periods prior to inception on 11/15/13 was calculated using historical Legacy class performance as adjusted for estimated class-specific expenses for shareholder servicing and sub-transfer agency fees without consideration to any expense limitation or waivers. The annual gross expense ratio is 1.18% as of 12/30/22. The annual net expense ratio is 1.18% as of 12/30/22. If the class had been offered prior to 11/15/13, the actual performance and expenses may have differed from the amounts shown. Legacy Class: Legacy class shares of the Fund are no longer available for purchase by new investors, except under certain limited circumstances which are described in the Statement of Additional Information. The annual gross expense ratio is 1.12% as of 12/30/22. The annual net expense ratio is 1.12% as of 12/30/22.

¹The Fund's Index, the Russell 2500™ Index, measures the performance of the small to mid-cap segment of the U.S. equity universe, commonly referred to as "smid" cap. The Russell 2500 is a subset of the Russell 3000® Index. It includes approximately 2500 of the smallest securities based on a combination of their market cap and current index membership. One cannot invest directly into an index.

²The Fund's second Index, the Russell 2500™ Value Index, measures the performance of the small to mid-cap value segment of the US equity universe. It includes those Russell 2500™ companies that are considered more value oriented relative to the overall market as defined by Russell's leading style methodology. One cannot invest directly into an index.

³Performance is annualized.

⁴Since inception returns are calculated using the month end data prior to the Fund's Legacy class inception date of 2/10/94.

Principal Investment Risks

The Investment Adviser uses the Fund's principal investment strategies and other investment strategies to achieve the Fund's investment objective of long-term growth of capital. There is no assurance that the Investment Adviser's investment strategies or securities selection method will achieve that investment objective. Equity securities fluctuate in price and value in response to many factors including historical and prospective earnings of the issuer and its financial condition, the value of its assets, general economic conditions, interest rates, investors' perceptions and market liquidity. The value of the Fund's investments will fluctuate in response to the activities of individual companies and general stock market and economic conditions. As a result, the value of your investment in the Fund may be more or less than your purchase price. The stock prices of small- and mid-capitalization and newer companies tend to fluctuate more than those of larger capitalized and/or more established companies and generally have a smaller market for their shares than do large capitalization companies.

There are risks involved with any investment. There are principal risks associated with an investment in the Fund, which could adversely affect its net asset value, yield and return. Please see the section "Further Information About Principal Risks" in the Prospectus for a more detailed discussion of these risks and other factors you should carefully consider before deciding to invest in the Fund. An investment in the Fund may lose money and is not a deposit of a bank or insured or guaranteed by the Federal Deposit Insurance Corporation or any other governmental agency.

Glossary:

Number of Holdings: The total number of individual equities held by the Fund. **Median Market Cap:** The midpoint of market capitalization (market price multiplied by the number of shares outstanding) of the stocks in a portfolio. **Price-to-Earnings:** A valuation ratio of current share price compared to its per-share operating earnings over the previous four quarters. **Price-to-Book:** A ratio used to compare a stock's market value to its book value. It is calculated by dividing the current closing price of the stock by the latest quarter's book value per share. **Price-to-Sales:** A ratio for valuing a stock relative to its own past performance, other companies or the market itself. Price to sales is calculated by dividing a stock's current price by its revenue per share for the trailing 12 months. **Price-to-Cash Flow:** A measure of the market's expectations of a firm's future financial health. Because this measure deals with cash flow, the effects of depreciation and other non-cash factors are removed.
